

A promising career at **stoba** Customized Machinery

Stoba Customized Machinery is a specialist in the development and manufacture, sale and servicing of production systems for electrochemical machining and is active internationally.

As a reliable partner for innovative system solutions, the company is a leader in the development and production of complex ECM/PECM system solutions, including integrated technologies such as fixture engineering, automation and cleaning processes. As a globally active company, we employ 45 staff at two locations.

To strengthen our team, we are looking to fill the following position as quickly as possible:

Service technician

What can you expect?

After an intensive orientation lasting several months, you'll begin your task of providing service to customers. The job will include the following tasks:

- Maintenance, repair, retrofitting and commissioning of our systems in Germany and abroad
- Independent analysis and repair of defects, including in the field of electronics
- Service calls and processing, including telephone and remote support functions
- Active customer service, i.e. technical service tasks

Your profile

- Education in mechanical engineering or electrical engineering
- Service experience, ideally in the field of customized machinery
- Experience with Siemens S7 and robotics
- Willingness to travel and handle a heavy workload

Are you a business-minded person? Are you good at English, willing to travel, flexible and resilient?

Are you looking for a job where you have the capacity to shape your work in terms of quality, quantity and time? Do you want to develop something? Do you enjoy working as part of a dynamic and motivated team? Do you prefer straightforward communication and decision-making?

Then send us your application for this very important position within our company, including your earliest start date and expected salary.

We look forward to receiving your application!
